

# ST5

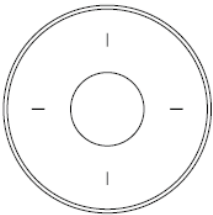

## USB Update Instructions

Required Materials:

- Blank USB stick FAT32 formatted, maximum 8Gb.

Instructions:

- Unzip and copy the unzipped file (named **image.swu**) to the USB stick.
- Power on the ST5 and allow it to boot until “READY” or “NO NETWORK” is displayed.
- Plug the USB stick into the back of the ST5.
- Using the remote control, press the settings button to open the settings menu.

	Menu Navigation  Centre button to select/OK
	Settings Menu

- In the settings menu, navigate up/down the menu to “USB Software Update”.
- Press the centre button of navigation pad to select this option, and again to confirm and start the update.
- The ST5 will display NET UPDATING for approx. 5 minutes, after which the unit will restart and will show HOST UPDATING and the Power LED will flash.

## Do not remove power from the ST5 during this process

- Once complete the unit will restart and the USB stick can be removed.
